## DETAILED ACTION

### *Election/Restrictions*

Claims 1-14, 16, 17 and 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lalonde et al. '959 further in view of Lehmann et al. '019. Lalonde et al. disclose a method for treating a blood vessel comprising introducing a catheter into the blood vessel, expanding a balloon of the catheter to engage the vessel wall and expanding fluid at a first location. Lalonde et al. teach all of the limitations of the claims except expanding a fluid at a second location. Lehmann et al. disclose a similar method and teach that it is old and well known to expand a fluid in multiple locations within the device (see figure 25) to allow greater aggregate cooling. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a second fluid injection member on the Lalonde et al. device to provide a means of allowing greater aggregate cooling.
